NAME
      cps-auth – Perform OAuth2 authentication for cloudprint-service

SYNOPSIS
      cps-auth [*<user name>*]

DESCRIPTION
      The **cps-auth** provide a wrapper for entering the required OAuth2 credentials for **cloudprint-service**. It will prompt the user with a URL for claiming the printer, and wait for the process to complete. The credentials are stored for **cloudprint-service**.

      The command must be run as root.

FILES
      /var/lib/cloudprint/authfile.json
              Credential storage location
