NAME
cloudprint-auth – acquire OAuth2 credentials remotely for cloudprint-service

SYNOPSIS
cloudprint-auth [*<user name>*]

DESCRIPTION
The **cloudprint-auth** performs the OAuth2 authentication for **cloudprint** or **cloudprint-service**, and outputs the credentials to stdout, in the format for the cloudprint authentication file. It is intended for remote use when the **cloudprint-service** server does not have a graphical environment.

cloudprint authentication files are stored by default in *˜/.cloudprintauth*. For **cloudprint-service**, the file is at */var/lib/cloudprint/authfile*.
